Contents Volume 69

Contents

Service provider oriented management systems over open cellular network infrastructures
P. Demestichas, V. Stavroulaki, V. Tountopoulos, M. Theologou and N. Mitrou 1

An adaptive flow control with the re-transmission policy over the server–proxy–client networking environment
C.-M. Huang and C.-K. Chang 15

Parameter driven synthetic web database generation
P. Priyadarshini, F. Qin, E.-P. Lim and W.-K. Ng 29

Efficient trip generation with a rule modeling system for crew scheduling problems
C. Goumopoulos and E. Housos 43

Viewpoints of DSP software and service architectures
A. Purhonen, E. Niemelä and M. Matinlassi 57

Content-aware cooperative caching for cluster-based web servers
W.H. Ahn, W.J. Kim and D. Park 75

Designing a high-performance database engine for the 'Db4XML' native XML database system
S. Sipani, K. Verma, J.A. Miller and B. Aleman-Meza 87

Minimum distance queries for time series data
S. Lee, D. Kwon and S. Lee 105

New methods for redistributing slack time in real-time systems: applications and comparative evaluations
R.M. Santos, J. Urriza, J. Santos and J. Orozco 115

Architecture-level modifiability analysis (ALMA)
P. Bengtsson, N. Lassing, J. Bosch and H. van Vliet 129

EMBOT: An enhanced motion-based object tracker
M. Zaki, M.Y. El Nahas and M. Youssef 149

Location management in cellular mobile computing systems with dynamic hierarchical location databases
G.-H. Li, K.-Y. Lam, T.-W. Kuo and S.-W. Lo 159

Real-time broadcast algorithm for mobile computing
S.-H. Lim and J.-H. Kim 173

Efficient validation of mobile transactions in wireless environments
V.C.S. Lee, K. Wa Lam and T.-W. Kuo 183

Brute force web search for wireless devices using mobile agents
K.G. Zerfiridis and H.D. Karatza 195

doi:10.1016/S0164-1212(03)00288-7

Guest editorial

Ubiquitous computing
J.J. Barton, R. Cerqueira and M. Fontoura 207

Roam, a seamless application framework
H.-h. Chu, H. Song, C. Wong, S. Kurakake and M. Katagiri 209

Tooling and system support for authoring multi-device applications
G. Banavar, L.D. Bergman, Y. Gaeremynk, D. Soroker and J. Sussman 227

Extending tuplespaces for coordination in interactive workspaces
B. Johanson and A. Fox 243

The BEACH application model and software framework for synchronous collaboration in ubiquitous computing environments
P. Tandler 267
